

RAMEZ KHALED ATTIA

Front-End Web Developer

Location: Egypt, Alexandria | **phone:** +201022069607 | **Email:** ramezkhaled259@gmail.com

LinkedIn: [linkedin.com/in/ramez-khaled](https://www.linkedin.com/in/ramez-khaled) | **GitHub:** github.com/RamezKhaled77

SUMMARY

Front-End Software Engineer with strong hands-on experience in building scalable, performant, and responsive web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Solid understanding of Computer Science fundamentals, modern state management, and RESTful API integration. Passionate about writing clean, maintainable code (SOLID, DRY) and delivering smooth, user-centric web applications.

WORK EXPERIENCE

Freelance Front-End Developer

01/2025 - Present

- Engineered responsive and user-centric web applications using React, Next.js, TypeScript, and Tailwind CSS, ensuring seamless cross-browser compatibility and optimal UI performance across desktop and mobile devices.
- Collaborated directly with clients and cross-functional teams to gather requirements, deliver tailored front-end solutions on schedule, and convert Figma/UI specs into production-ready code.
- Developed reusable, scalable UI component systems and validated dynamic user inputs using modern tools (React Hook Form, Zod), adhering to clean code practices (DRY, SOLID).
- Integrated RESTful APIs and managed complex client-side state using Zustand / Redux Toolkit / React Query, optimizing application data-fetching and reducing UI latency.

FEATURED PROJECTS

1- E-Commerce Web Application | Graduation Project - Team Lead:

- A fully responsive online store allowing users to browse products, add items to cart, add items to wish list, and simulate checkout.
- **Tech Stack:** PHP, MySQL, JavaScript (ES6+), HTML5, Bootstrap, CSS3
- **Key highlights:**
 - Led a cross-functional team in designing and developing a full-featured e-commerce platform, managing project roadmap, task delegation, and code reviews.
 - Architected core front-end features including dynamic product listing, advanced multi-criteria filtering, real-time search, and responsive user interfaces. Designed with reusable components and clean code structure.
 - Engineered a client-side cart & wishlist system with dynamic price calculations, quantity management, and seamless checkout state flow.
 - Designed reusable UI components and structured modular codebase prioritizing DRY and SOLID clean code principles.

2- Ashiaa Store (متجر أشياء) | Production E-Commerce Platform: [\[View Project\]](#)

- A full-featured e-commerce platform deployed to production for real active users, featuring a dynamic product catalog, interactive shopping cart, and smooth checkout workflows.
- **Tech Stack:** React.js, Tailwind CSS, Supabase, State Management
- **Key highlights:**
 - Engineered and deployed a live e-commerce platform serving real active users, optimizing UI performance and responsive accessibility across desktop and mobile screens.
 - Developed interactive user interfaces for product catalog browsing, dynamic search, multi-category filtering, and a client-side shopping cart system.
 - Integrated dynamic APIs and state management to handle smooth data fetching, seamless checkout workflows, and user interaction states.
 - Optimized web application performance and loading speed, maintaining high client satisfaction and smooth user experience.

3- Storage & File Sharing Platform: [\[View Project\]](#)

- A modern cloud storage web application built with Next.js 15 and Appwrite, featuring secure user authentication, file management, dynamic storage analytics, and real-time file sharing.
- **Tech Stack:** Next.js 15, React 19, TypeScript, Appwrite, Tailwind CSS, ShadCN UI
- **Key highlights:**
 - Engineered a full-featured cloud storage platform utilizing Next.js 15 (App Router) and React 19, providing seamless file management, upload, sharing, and dynamic analytics.
 - Integrated Appwrite Backend-as-a-Service (BaaS) for secure user authentication, file storage bucket management, and real-time database queries.
 - Built an interactive dashboard UI with ShadCN & Tailwind CSS, featuring global cross-platform search, sorting algorithms (by size, date, name), and storage usage analytics grouped by file types.
 - Implemented core file-handling features including multi-format media upload, secure cross-user file sharing, direct downloads, and responsive dynamic previews.

4- EDMN Project (Freelance Project): [\[View Project\]](#)

- A web platform designed to simplify financial interactions between two parties by streamlining money requests, approvals, and transaction tracking.
- **Technologies used:** HTML, CSS, Tailwind CSS, JavaScript
- **Key highlights:**
 - Built a user interface for initiating and tracking transactions between two users.
 - Designed and validated secure form inputs for sending/receiving payment requests.

COURSES & CERTIFICATES

- **Front-End Web Development | At El Zero Web School.**
- **Advanced Front-End Web Development (Vue.js - Firebase) | BATU.**
- **Advanced JavaScript & Git / GitHub | At Al madrasa.**
- **React.js - Next.js | At Udemy.**
- **Build with AI Workshop | Google Developer Groups (GDG), 2025.**

EDUCATION

BSc in Information Technology - (Ongoing)
Borg Al Arab Technological University – Faculty of Industrial and Energy
Alexandria, Egypt , 2023 – Present
